Example RDA Performance Results:

	Client Need	Resolution / Outcome
Southeast Academic Health System (4 hospitals + >100 Clinics)	• Needed significant implemented savings – rapidly • Needed a sustainable savings identification & implementation process • Savings connected to P&L • Enhance Value Analysis from "New Product Approval Committee" to formal Value Analysis program (data-driven)	• **Implemented $19M annual savings in 10 months (21% expense reduction)** • **Enhanced the value analysis structure for supply and services decisions** • **Documented and implemented streamlined processes** • **Streamlined Physician Engagement Process** • **Trained existing and new staff**

RDA has worked with numerous organizations nationwide to assess, expedite specific initiatives or transform overall supply chain programs.

Assessment Focused

Diagnose current state & identify recommended future state

Specific supply chain functions or the entire supply chain

Initiative Focused

Provide SMEs with specialty expertise

Support specific initiatives or projects

Expedite results

Train existing or new staff

Optimize inventory & space

Transformation Focused

Transform supply chain from good to great

Reduce non-labor spend (e.g. supplies, purchased services, IT, capital, pharma)

Design & implement a sustainable structure that provides continual improvement

Train team on new processes

Connect savings to the P&L
