Unlock Efficiency and Excellence with RDA's Online Training Solutions

In today's dynamic healthcare landscape, optimizing operations in Ambulatory Surgery Centers (ASCs) is paramount to success. We understand the unique challenges you face and that's why we're excited to introduce RDA's comprehensive training solutions tailored specifically for ASCs.

Cost Effective Solution

We recognize that while reducing costs is a priority, upfront expenses can be daunting. With RDA's online and on-demand training, you gain access to expert insights without breaking the bank. Our courses are designed by healthcare experts who understand the nuances of ASCs, ensuring maximum return on investment over the long term.

User Friendly & On-Demand Training

RDA's online training modules are easy to use and designed for organizations with limited bandwidth to train staff and new leaders. Courses are accessible via any desktop, laptop, or mobile device and are available 24/7. Courses are structured for sporadic learning with minimal disruptions to day-to-day operations.

Build Internal Expertise

While external expertise is valuable, developing internal capabilities is equally important. Our training empowers your team to advance their expertise and bridge knowledge gaps for sustainable results.

Easy Access. Easy Use. Pay Online with PayPal.

ASC Curriculum Courses \$125 per Credit Hour/Person

ASCA Special NOW \$112.50 if you register for courses by 5/10/24!

Bare Facts of Healthcare Supply Chain for Non-Acute Facilities

Course covers the basic concepts of the healthcare supply chain. The course covers the different types of entities involved as well as basic elements in the healthcare supply chain. This course is for individuals new to non-acute supply chain, ASCs, or those who want to learn more about the non-acute supply chain.

Requisition to Clinician for Non-Acute Facilities

Course covers flow of products from the time a supply is requested until it is used by the clinician in a healthcare organization and Materials Management. This course is for individuals who are new to non-acute operations or who want to learn more about how the non-acute supply chain works at a high level.

Bare Facts of the Operating Room (OR) Supply Chain

Course covers a high-level overview of topics pertaining to working in the OR Supply Chain and Materials Management. This course covers the OR environment, procedures and precautions that one should be aware of before working in the OR Supply Chain or OR Materials Management.

Healthcare Financials for Supply Chain

Course covers a high-level overview of healthcare financials as related to the healthcare supply chain and how healthcare financials differ from other industry financials.

Invest in the future of your ASC with RDA's innovative supply chain / materials management training solutions. Contact us today to schedule a consultation and take the first step towards unlocking efficiency and excellence in your operations.
