

# Our Supply Chain Academy Online Programs

## Best Practices Shared = Best Outcomes For Your Team

RDA has combined years of experience with best practices from multiple healthcare organizations to create online and facilitated healthcare supply chain courses. The online courses are available on demand, while facilitated courses can be scheduled for groups or individuals. Additionally, RDA can create customized training for organizations.

### Who is RDA's Academy for?

- New staff members or staff new to healthcare supply chain
- Existing staff in a new role looking to enhance supply chain knowledge
- Leaders with limited time to train new staff

### Benefits of RDA's Academy Programs

- Online, virtual, or in-person training
- Flexible training schedule
- Certificate for each course completed
- Best practices developed from experience with hundreds of health systems nationwide
- Facilitated training led by experienced supply chain leaders

Upon completion of each course, learners will receive a certificate that can be used for certifications.

# ONLINE COURSES

RDA offers a range of online courses available for immediate purchase and use by individuals and organizations. Upon successful completion, participants receive a certificate of completion to recognize their achievement.

**Course:**  
**Description:**

## Bare Facts of Healthcare Supply Chain

This course explores the basic concepts of the healthcare supply chain, including the entities involved and the core elements that keep it running smoothly.

COURSE LENGTH  
~ 1  
Hour

**Course:**  
**Description:**

## Bare Facts of the OR Supply Chain

This course provides a high-level overview of key topics related to working in the OR supply chain. It covers the OR environment, procedures, and precautions that should be understood before entering or working in the OR supply chain.

COURSE LENGTH  
~ .5  
Hour

**Course:**  
**Description:**

## Requisition to Clinician

This course explores how acute facilities make spend decisions and the typical steps involved – from the time buying decisions are made to the time supplies or services are available for use.

COURSE LENGTH  
~ 1.25  
Hours

**Course:**  
**Description:**

## Healthcare Financials for Supply Chain

This course reviews financial concepts related to the healthcare supply chain. It provides insights into the three major financial statements, billing and payment resources, patient charges, and supply chain actions that impact financial performance.

COURSE LENGTH  
~ 1  
Hour

**Course:**  
**Description:**

## Non-Clinical Healthcare Protocols

This course covers the universal protocols used in healthcare facilities.

COURSE LENGTH  
~ .25  
Hour

**Course:**  
**Description:**

## Inventory Management 101

This course offers a high-level overview of inventory management within the healthcare supply chain. It covers different inventory types, methods, technologies and tools, and best practices for effective inventory management.

COURSE LENGTH  
~ 2  
Hours

**Course:**  
**Description:**

## Bare Facts of Healthcare Supply Chain (Non-acute)

This course covers the basic concepts of the non-acute healthcare supply chain for individuals interested in learning more. It includes an overview of the different types of entities involved and the core elements of the non-acute supply chain.

COURSE LENGTH  
~ 1  
Hour

**Course:**  
**Description:**

## Requisition to Clinician (Non-acute)

This course explores how non-acute facilities make spend decisions, and the typical steps involved – from the time buying decisions are made to the time a supply or service is available for use.

COURSE LENGTH  
~ .5  
Hour

# ONLINE COURSES

RDA offers a range of online courses available for immediate purchase and use by individuals and organizations. Upon successful completion, participants receive a certificate of completion to recognize their achievement.

**Course:**  
**Description:**

## Inventory Management 101

This course offers a high-level overview of inventory management within the healthcare supply chain. It covers different inventory types, methods, technologies and tools, and best practices for effective inventory management.

COURSE LENGTH  
~ 2  
Hours

**Course:**  
**Description:**

## Project Management Principles for Non-Project Managers

Designed for individuals who are not project managers, this course offers project management principles to aid in any size initiative. Topics include the project life cycle, creating a project charter and plan, and methods for monitoring and managing potential risks.

COURSE LENGTH  
~ 1  
Hour

### Contract Foundation Series

**Course:**  
**Description:**

## Principles of Contracts for Healthcare Professionals

This course introduces the healthcare contracting function. Topics include the what and why of contracts, key roles in contract development and management, and different contract types.

COURSE LENGTH  
~ .5  
Hour

**Course:**  
**Description:**

## Anatomy of a Contract

This course introduces the different parts of a contract and explains why they are important. The course covers basic contract structure, different protection clauses, and supplementary documents used in contracts.

COURSE LENGTH  
~ .5  
Hour

**Course:**  
**Description:**

## Strategic Negotiation for Healthcare Contracts

This course presents negotiation strategies, tactics, and techniques to successfully plan, conduct, and finalize contract negotiations.

COURSE LENGTH  
~ 1.5  
Hours

**Course:**  
**Description:**

## Negotiating Contract Sections: Application

This course challenges learners who have completed the Contract Foundations series to apply knowledge of contract sections and negotiation principles through realistic scenarios.

COURSE LENGTH  
~ .5  
Hour

\*These courses can be purchased by individuals or by companies for multiple individuals

\*\*These courses can be purchased by companies for multiple individuals

# ONLINE COURSES

RDA offers a range of online courses available for immediate purchase and use by individuals and organizations. Upon successful completion, participants receive a certificate of completion to recognize their achievement.

## Logistics Foundation Series

**Course:**  
**Description:**

### Introduction to Logistics Operations

E-learning course that defines logistics operations in a hospital and explains its importance to patient care. Learners review types of departments that are supported by logistics, core functions, typical workflows, key activity triggers, and the overall impacts of logistics to a healthcare organization.

**Course:**  
**Description:**

### Navigating The Transportation Pipeline

E-learning course that explores transportation within the healthcare supply chain and its role in moving materials efficiently and safely. Learners examine transportation modes, inbound and outbound destinations, and the importance of proper transportation documentation.

**Course:**  
**Description:**

### Receiving: The Art of Validation

E-learning course that defines the receiving function in the healthcare supply chain and outlines its foundational principles. Learners review the receiving process across transportation types, how to manage discrepancies, mitigate risks, and the impact of effective receiving on operations to the organization and to the patient.

**Course:**  
**Description:**

### Everything in Its Place: Staging, Delivery, Putaway, and Storage

E-Learning course that explains staging, delivery, putaway, and storage within the healthcare supply chain and its importance to efficient operations and patients. Learners review delivery modes, storage types and locations, controlled versus non-controlled requirements, item placement decisions, and the technologies used to confirm accurate putaway and storage.

**Course:**  
**Description:**

### Use and Replenishment: Connecting Supply Chain to Patient Care

E-learning course that defines use and replenishment within the healthcare supply chain and its role in maintaining product availability. Learners identify who uses supplies, review common replenishment triggers, and explore technologies that support replenishment activities.

\*These courses can be purchased by individuals or by companies for multiple individuals

\*\*These courses can be purchased by companies for multiple individuals

## Course Description

### Bare Facts of Healthcare Supply Chain (Non-acute)

This course covers the basic concepts of the non-acute healthcare supply chain for individuals interested in learning more. It includes an overview of the different types of entities involved and the core elements of the non-acute supply chain.

COURSE LENGTH  
~ 1  
Hour

Learners	Learning Objectives
<ol style="list-style-type: none"> <li>Individuals new to the healthcare supply chain industry</li> <li>Clinical personnel seeking to understand overall supply chain processes</li> <li>Supply chain individuals that have some supply chain knowledge</li> </ol>	<ol style="list-style-type: none"> <li>Explain the basic concepts of the healthcare supply chain</li> <li>Describe the role of the different types of entities involved in healthcare supply chain</li> <li>Identify the basic healthcare supply chain functions</li> </ol>

Upon completion of each course, learners will receive a certificate that can be used for certifications.

# ONLINE COURSES

RDA offers a range of online courses available for immediate purchase and use by individuals and organizations. Upon successful completion, participants receive a certificate of completion to recognize their achievement.

**Course Description**

## Requisition to Clinician (Non-acute)

This course explores how non-acute facilities make spend decisions and the typical steps involved – from the time buying decisions are made to the time a supply or service is available for use.

**COURSE LENGTH**  
~.5  
Hour

### Learners | Learning Objectives

- 1. Supply chain techs, supervisors, leaders, financial professionals, and clinicians
- 2. IT individuals who want to better understand how the process works
- 3. Supply chain professionals with some experience who would like a more global view of the clinical experience

- 1. Trace and explain the supply process flow within a healthcare facility, from end-user requisition to point-of-use
- 2. Identify the people and technology used to move supplies within a healthcare facility

Upon completion of each course, learners will receive a certificate that can be used for certifications.

## Course Description

### Project Management Principles for Non-Project Managers

Designed for individuals who are not project managers, this course offers project management principles to aid in any size initiative. Topics include the project life cycle, creating a project charter and plan, and methods for monitoring and managing potential risks.

**COURSE LENGTH**  
~ 1 Hour

## Learners

1. Non-project managers interested in learning the fundamentals of project management

Upon completion of each course, learners will receive a certificate that can be used for certifications.

## Learning Objectives

1. Describe the five phases of project management
2. Explain why using a project management (“PM”) lifecycle is beneficial
3. Create a project charter
4. Identify stakeholders, sponsor, project team, etc.
5. Create a project plan
6. List methods to execute and monitor the project
7. Discuss risk mitigation and contingency plans
8. Explain a proper project close-out

**Course Description**

## Introduction to Logistics Operations

E-learning course that defines logistics operations in a hospital and explains its importance to patient care. Learners review types of departments that are supported by logistics, core functions, typical workflows, key activity triggers, and the overall impacts of logistics to a healthcare organization.

**COURSE LENGTH**  
~.5 Hour

### Learners Learning Objectives

1. Individuals that are:
  - a. Seeking to learn more about logistics functions and why they are important
  - b. New to or seeking to learn about healthcare logistics in a hospital setting

1. Define logistics operations and state its importance.
2. Describe the typical areas/departments that logistics operations support
3. List and describe the functions in logistics operations and the general flow
4. Identify triggers that initiate logistics activities
5. Describe logistics operations impact to patient care and healthcare facilities

Upon completion of each course, learners will receive a certificate that can be used for certifications.

# ONLINE COURSES

RDA offers a range of online courses available for immediate purchase and use by individuals and organizations. Upon successful completion, participants receive a certificate of completion to recognize their achievement.

**Course Description**

## Navigating The Transportation Pipeline

E-learning course that explores transportation within the healthcare supply chain and its role in moving materials efficiently and safely. Learners examine transportation modes, inbound and outbound destinations, and the importance of proper transportation documentation.

**COURSE LENGTH**  
~.5 Hour

### Learners Learning Objectives

1. Individuals that are:
  - a. Seeking to learn more about logistics functions and why they are important
  - b. New to or seeking to learn about healthcare logistics in a hospital setting

1. Describe the various modes of transportation used to move materials
2. Explain why transportation methods matter.
3. List and describe the types of destinations for inbound shipments
4. List and describe the types of destinations for outbound shipments
5. Describe the types of transportation documentation

Upon completion of each course, learners will receive a certificate that can be used for certifications.

## Course Description

### Receiving: The Art of Validation

E-learning course that defines the receiving function in the healthcare supply chain and outlines its foundational principles. Learners review the receiving process across transportation types, how to manage discrepancies, mitigate risks, and the impact of effective receiving on operations to the organization and to the patient.

**COURSE LENGTH**  
~.5 Hour

## Learners | Learning Objectives

1. Individuals that are:
  - a. Seeking to learn more about logistics functions and why they are important
  - b. New to or seeking to learn about healthcare logistics in a hospital setting

1. Define Receiving and list three fundamental truths
2. Describe the basic Receiving process regardless of transportation type
3. Explain the Receiving process by transportation type
4. Describe the method for handling discrepancies
5. Explain the impact of Receiving and identify risk mitigation strategies

Upon completion of each course, learners will receive a certificate that can be used for certifications.

## Course Description

### Everything in Its Place: Staging, Delivery, Putaway, and Storage

E-Learning course that explains staging, delivery, putaway, and storage within the healthcare supply chain and its importance to efficient operations and patients. Learners review delivery modes, storage types and locations, controlled versus non-controlled requirements, item placement decisions, and the technologies used to confirm accurate putaway and storage.

**COURSE LENGTH**  
~.5 Hour

Learners	Learning Objectives
<p>1. Individuals that are:</p> <ul style="list-style-type: none"> <li>a. Seeking to learn more about logistics functions and why they are important</li> <li>b. New to or seeking to learn about healthcare logistics in a hospital setting</li> </ul> <p>Upon completion of each course, learners will receive a certificate that can be used for certifications.</p>	<ol style="list-style-type: none"> <li>1. Define staging and delivery</li> <li>2. List the delivery modes used to transport supplies</li> <li>3. Describe best practices for optimizing staging and delivery</li> <li>4. Define putaway and storage</li> <li>5. Define controlled and non-controlled items and storage</li> <li>6. Identify the types of storage locations</li> <li>7. Explain how storage types are selected</li> <li>8. List technology methods</li> </ol>
